S08

DIFFERENCE IN LEVEL
UP TO 1.000 mm

EASY,
SAFE

Easy installation and safety in operation make the S08 an ideal system for freedom of access to buildings of all types, assuring wheelchair users independent mobility.

S08

QUICK INSTALLATION

Adapts perfectly to all functional and aesthetic needs. The S08 model does not require a pit of any kind; the installation can be customized to the existing structures.

The S08 platform lift is the ideal solution for assuring the ACCESSIBILITY to:

PRIVATE PREMISES

(banks, restaurants, shops, offices...)

HOMES AND RESIDENTIAL BUILDINGS.

EASY AND SAFE TO USE

Thanks to its electric lock, the gate is automatically opened when the platform reaches the top.

The on-board and floor control panels are equipped with keys and can be used easily.

EXCELLENT CONSTRUCTION

As an option, S08's outstanding features include a stainless steel structure, design with attention to every detail and state-of-the-art active and passive safety features, as well of course as the well-proven mechanical drive system.

S10

DIFFERENCE IN LEVEL
UP TO 2.000 mm

FULL COMPLIANCE WITH
AUSTRALIAN STANDARDS AND
INTERNATIONAL BEST
PRACTICES.

The user's safety is guaranteed by all the latest active and passive safety systems, including: safety gear, self-leveling system, emergency descent mechanism, and anti-blackout device.

Attention has also been paid to every safety-enhancing detail, such as the platform floor that is made by non-slip embossed natural aluminium.

The S10 platform is an extremely versatile piece of equipment. It is available in three different versions according to the travel height and design. With varying platform dimensions available, we are able to meet all customer requirements.

S10

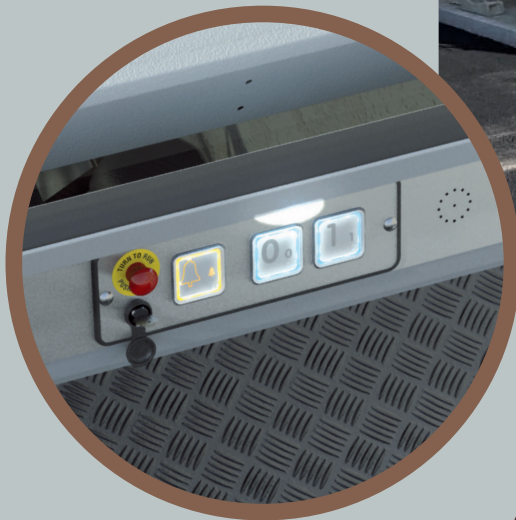

VERSATILE

S10 can be installed either in pre-existing openings or in its own shafts, it is also suitable for the outdoors as all the components are water proof.

DESIGN AND TECHNICAL FEATURES

The S10 platform lift's technical and stylish features, make it a favourite among the best Italian installation engineers. Its hydraulic mechanics, and metal or grey polycarbonate enclosure improve the design and the aesthetics of the lift. Our supplier has designed a control on board and a landing radio control which makes this model the functional leader in the market place.
